Problem Solver

Composting

Hot Composting: Outdoors

- **Layers of :** 1 Part Greens plus 2 Parts Brown Materials
- Maintain Consistency of Wet Sponge
- Turn Regularly, to add Oxygen = speed
- Use a Compost Thermometer, temps over 150 F will kill weed seeds too!

Cold Composting: Indoors and Outdoors

- Uses Worms, who eat just at the before rotten stage of Food decomposition (worms have no teeth), so no smell to the compost, castings or tea
- Odorless & quick
- Catch the Tea & use as well as castings
